##### Jet Fuel Demand

- Stay-at-home orders and travel restrictions have drastically reduced aviation travel and associated jet fuel consumption. A good measure of air travel activity is the number of people screened at U.S. airports by the Transportation Security Administration (TSA).
  - Passenger counts increased to an average of [217,000 \(+4,000\)](#) per day over the last seven days ([May 12-18, 2020](#)).

##### Gasoline Demand

- INRIX tracks personal vehicle travel patterns throughout the United States and their analysis indicates that personal travel was down approximately 48% during early to mid-April but for the week ending May 15, 2020, the reduction is estimated to be only 25% compared to the same period the previous year. California personal travel is now (week ending May 15, 2020) estimated to be off by only 33 % versus 55 % from five weeks previous.

##### Diesel Fuel Demand

- Latest weekly release from INRIX shows national long-haul trucking activity is down only 6.1 % for the week ending May 15, 2020, compared to a similar period last year. This is an improvement when compared to the 7.6 % decline for the previous week. This could be an indication of improved trucking activity but additional reports will need to be tracked to see if there is a sustained Improvement.
